MESO PURE PEEL

Several naturally occurring A-HA

Alpha hydroxy acids have been shown to promote smoother, younger looking skin by increasing the rate of cell renewal.

MESO PURE PEEL meets the standards for ecological and organic cosmetics according to ECOCERT (www.ecocert.com).

MESO PURE PEEL

Effects

Glycolic acid exhibits the most keratolytic ability of any of the AHAs. Citric acid, when topically applied, stimulates collagen synthesis. Both tartaric and malic acid boost skin elasticity. Lactic acid is a highly effective moisturizer

MESO PURE PEEL meets the standards for ecological and organic cosmetics according to ECOCERT (www.ecocert.com).

MESO PURE PEEL

Natural Vs Synthetic Alpha Hydroxy Acids

With the advent of MESO PURE PEEL, it seems that we have combined natural purity with excellent activity. While AHAs have a potential to be irritating to skin, they also effectively stimulate cell renewal. Biopeel surpasses the activity of the synthetic lactic and glycolic acids. In Biopeel, we have maximized the ability to stimulate cell renewal, while minimizing the potential for irritation.

MESO PURE PEEL meets the standards for ecological and organic cosmetics according to ECOCERT (www.ecocert.com).

MESO PURE PEEL

Efficacy Studies: Dansyl Chloride Staining

MESO PURE PEEL was evaluated in both aqueous solutions (10%) and in a commercially available cosmetic cream (4%), via a dansyl chloride cell renewal protocol. Panelists were patched for 24 hours with 5% dansyl chloride in a petrolatum base. All subjects were examined on Day One with quartz mineral UV lamps (long and short wave) to ensure that the fluorescent stain had been taken up by the stratum corneum layers. Test materials were then applied to sites on the volar forearm. At a 10% dilution, MESO PURE PEEL produced a 34% increase in cell renewal when compared to the untreated control site. Accordingly, there was a 143% increase in the number of squames generated. Evaluated at 4% in a commercial cream, Biopeel increased cell turnover by 20% relative to the control formulation. This data collectively, correlates with Biopeel ability to stimulate cell renewal.

MESO PURE PEEL

Key Product Attributes

- Natural source of AHAs from botanical extracts
- Maximum efficacy with minimum irritancy
- 55% active at a pH ~ 4.0
- Promotes healthy scalp (cell renewal)
- Promotes skin radiance

MESO PURE PEEL meets the standards for ecological and organic cosmetics according to ECOCERT (www.ecocert.com).
